Surface Enhancement Experts

Permanent Marking and Banding Technology

Designers of medical devices can now have **both**, a low friction PTFE coating and permanent, contrasting, highly visible marks, bands or text/numbers within a medical grade PTFE coating.

Visi MarkSM provides permanent alpha-numeric characters to denote manufacturing codes, date, style, etc. The combination of both banding and alpha-numeric characters is available for cannulas, guidewires, and any medical device to which SSG applies PTFE and other specialized coatings.

Designers have many options with Visi MarkSM to create the identification and marking pattern they want.

- Visi MarkSM
Banding and bar code identification 
- Visi MarkSM AM
Alpha numeric codes of any combination 
- Visi MarkSM S
Spiral Stripes on Guidewires 
- *Any combination of banding, alpha numeric codes, or spiral stripes you design* 

Imagine permanent markings within and clearly readable as part of a PTFE medical grade coating in contrasting colors of your choice. Now, all of the above are available with Visi MarkSM, Visi MarkSM AM, and Visi MarkSM S or any combination of your choice.

Visi MarkSM is available in several base colors & contrasting marks
U.S. and Foreign Patents Pending
