Surface Enhancement Experts

Permanent Marking and Banding Technology

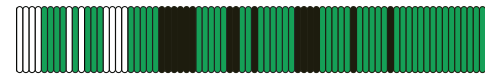

Designers of medical devices can now have **both**, a low friction PTFE coating and permanent, contrasting, highly visible marks, bands or text/numbers within a medical grade PTFE coating.

Visi Mark<sup>SM</sup> provides permanent alpha-numeric characters to denote manufacturing codes, date, style, etc. The combination of both banding and alpha-numeric characters is available for cannulas, guidewires, and any medical device to which SSG applies PTFE and other specialized coatings.

Designers have many options with Visi Mark<sup>SM</sup> to create the identification and marking pattern they want.

- **Visi Mark<sup>SM</sup>**

*Banding and bar code identification*

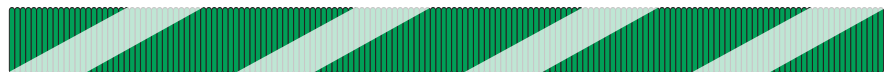

- **Visi Mark<sup>SM</sup> AM**

*Alpha numeric codes of any combination*

- **Visi Mark<sup>SM</sup> S**

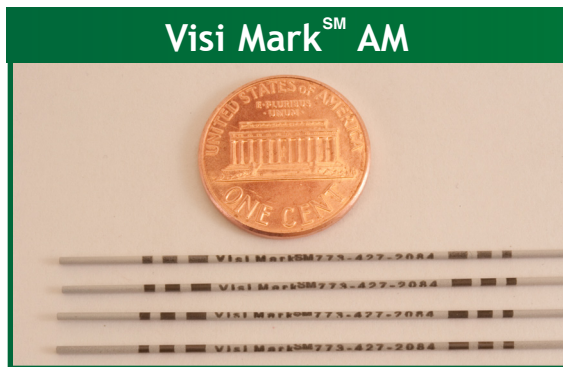

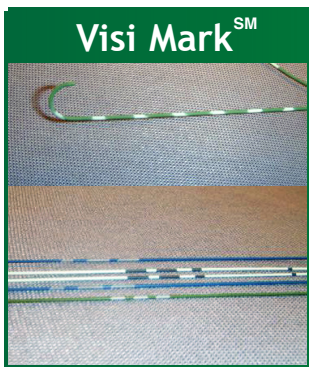

*Spiral Stripes on Guidewires*

- *Any combination of banding, alpha numeric codes, or spiral stripes you design*

Imagine permanent markings within and clearly readable as part of a PTFE medical grade coating in contrasting colors of your choice. Now, all of the above are available with Visi Mark<sup>SM</sup>, Visi Mark<sup>SM</sup> AM, and Visi Mark<sup>SM</sup> S or any combination of your choice.

Visi Mark<sup>SM</sup> is available in several base colors & contrasting marks
