

VisiMark® Serializing and Lot Tracing Technology

Permanent, legible alphanumeric marking of PTFE coated guidewires and medical devices is now possible with VisiMark® from Surface Solutions Group, LLC. Any combination of letters, numbers and symbols is available to custom mark your medical products. Concerns about product traceability and even counterfeiting are solved with VisiMark®. To learn more or to receive an engineering evaluation for VisiMark® processed guidewires or cannulas from our engineering department call (773) 427-2084 or e-mail us at info@surfacesolutionsgroup.com.

VisiMark® AN

Alphanumeric coding in any combination of letters, numbers, and symbols is available.

VisiMark® provides permanent alphanumeric characters to denote manufacturing codes, date, style, etc. The combination of both circular banding and alphanumeric characters is available for cannulas, guidewires, and any medical device to which SSG applies PTFE and other coatings.
